# **ABOUT ME**

**My name is Danny Luu Nguyen, Born and raised in San Francisco California. My Birthday is March 22 2003, and am currently 19. I like playing video games and socializing with my friends online.**

**I graduated from George Washington High School and now going into City College for my 1st year in the semester while planning on transferring to a 4 year school. I chose Graphic Design as my major as I like getting creative as well as making stuff using any art programs I can get my hands on especially on the computer.**

PARTY TIME!

# PHOTOSHOP

**This was my final photoshop project, wanted to do something with one of the pictures I had laying around and chose to do a selfie one. The lights in the photo made felt like it was a party so I stuck with a theme behind by adding a blur to make it look like I was partying along with a disco ball in the back. Parties are a thing that capture memories and polaroids are known for that so I added a boarder with a marker-written text.**

# ILLUSTRATOR

**This was my final illustrator project, I used one the characters provided and thought of an idea behind it. Ninja's cut things and wanted to make it like it was a business around it. I further added the provided shapes for the logo. The tools that barbers use for the ninja's hand, and came up with the name Ninja Stache. Found a free stock image to stick with a the theme added some black and white colors with a blur.**

# NINJA STACHE

WHERE STACHES GET SLASHIN!

# **ANIMATE**

**This was my final animate project, I used the same project from the previous but wanted to make an animation for it. The sounds that were provided helped to give that whoosh feel with the ninja doing a flip as they are known to have crazy movements. I added a text below to symbolize what barbers do, which is cut hair.**
